# DIRECTOR'S NOTE

1978 - The year when Precision Pipes was incorporated with a mission and vision to be the lifeline of every building and bring every home to life.

Cut to the present day where, as our tagline would have it, Precision Pipes has become the 'Desh ki lifeline' .

Our journey so far has been all about innovation, understanding the need of the hour and promptly acting upon it, and changing the overall consumer perception about the category with our wide range of products.

We started off with a range of electrical piping systems including Round Conduit PVC Pipes, G.I. & M.S. Conduit Pipes, PVC Mini / Maxi Trunking Profile, PVC Panel Trunking, Corrugated Flexible Conduit Pipes and Fittings.

We've also diversified our offerings so as to cater to a wider audience looking for plumbing piping systems, with our CPVC, ASTM (PVC), Sewerage Waste and Rainwater (SWR), Agriculture Pipes and Fittings.

To be the 'Desh ki lifeline' , it was imperative for us be connected with the country right from the grassroot level. So we built large scale manufacturing locations at Daman, Bengaluru, & Gujarat.

We've also built a strong distribution network that adheres to national and international standards recognized by leading consultants, architects, construction industries, government departments, defense, railways and automobile industries.

Also, all our products comply with major national and international standards like the ISO 9001: 2015, IS (Indian Standard), BS (British Standard) and CE for Low Voltage Directive.

This has ensured that consumers can buy our products through a dedicated sales network in India as well as in Europe, Middle East, Africa etc.

We've come a long way in our journey so far, but we at Precision Pipes continue to innovate every single day to keep on being 'Saare desh ki lifeline' .

**Kunal S. Kadakia**

## ROUND CONDUIT (PVC) PIPES & FITTINGS

### Precision Round Conduit PVC Pipes & Fittings

are manufactured from a specially formulated polyvinyl chloride (PVC) to meet the most stringent Indian and international standards. Our products are made of extra super high impact material which make them safe to use in harsh environments. The products are manufactured in accordance with IS 9537 - Part 3, BS EN 61386-21 for PVC conduits, IS 3419 : 1988 and BS 4607 for PVC fittings.

## Applications

Channelising concealed and surface wiring

Telecommunication and cable ducting

### DIMENSIONS OF ROUND CONDUIT PVC PIPES IS 9537- PART 3

Nominal Size (mm)	Outside Diameter (mm)	Tolerance on Outside Diameter (mm)	Inside Diameter (Min.) (mm)		
			Light	Medium	Heavy
20	20	-0.3	17.4	16.9	15.8
25	25	-0.4	22.1	21.4	20.6
32	32	-0.4	28.6	27.8	26.6
40	40	-0.4	35.8	35.4	34.4
50	50	-0.5	45.1	44.3	43.2
63	63	-0.6	57.0	-	-
<b>#SPECIAL SIZES</b>

## Features

Various Diameters  
& Grades

Fire Retardant  
& Corrosion Free

Easy and Quick  
Installation

Thermal Resistant  
(-5° C to +60° C)

Durable & Impact  
Resistant

Laser Engraved  
Pipe

- Light, medium and heavy mechanical stress, to suit various applications and site conditions
- Wide range of component maximises application
- Precision circular boxes and adaptable boxes are provided with M4 brass insert with a load suspension capacity of 3 Kgs at +60° C

## ALL WEATHER BOXES

**Precision All Weather Boxes** are manufactured from high quality impact resistant Engineering Thermoplastics (Polycarbonate / ABS). The material itself is self-extinguishing and our specially developed formulation gives it special ability to withstand high temperatures. The product passes stringent IP 67 standard requirements which makes it suitable to use indoor and outdoor in harsh environment. Our specially made design gives it highest level of safety from unwanted ingress of oil / water / any other solid waste.

## Applications

Enclosure boxes for electrical installations.

Suitable for Outdoor / Indoor environment

## Features

- IP 67 compliance, suitable for Outdoor Installations (CIPET tested)
- Specially formulated Engineering Thermoplastic (Polycarbonate / ABS) gives temperature protection ranging from  $-40^{\circ}\text{C}$  to  $+90^{\circ}\text{C}$
- Weatherproof, Dust proof and Impact resistant
- Transparent lids ensure enhanced visibility
- Innovative design makes compatible for various types of Switchgears / Electrical components
- Body part with adequate molded markings for easy cable entry location from all sides
- Various sizes available as per individual choice
- Screws supplied are made up of anti-rust SS / Engineering Plastic for corrosion free working and durability as well

## G.I & M.S. CONDUIT PIPES & FITTINGS

**Precision G.I & M.S. Conduit Pipes** are manufactured from rigorously tested raw material, in accordance with IS 9537 Part- 2. G.I. Conduit Pipes are coated at a hot dipped galvanising plant in which iron or steel is coated with a layer of zinc. This coating makes the conduit safe and durable for industrial installations, coastal line atmosphere & thermal power stations. M.S. Conduit Pipes are treated and coated with paint.

## Applications

Channelising electrical surface wiring and cable ducting

## PVC MINI/MAXI TRUNKING PROFILE & FITTINGS

### Precision PVC Mini/Maxi Trunking Profile & Fittings

are manufactured from high impact polyvinyl chloride (PVC) grade material capable of withstanding the most hazardous conditions on-site and exceeds the most stringent requirements of Indian and International standards.

The product range brings a whole new world of sophistication and convenience to home, office and commercial establishments and is in accordance with Indian Standard IS 14927 - Part 2 and BS EN 50085 -2-1. Mini Trunking Profile are also available with self-fixing tape for instant and easy installation. Clip on lid provides security while allowing easy maintenance.

Precision PVC Maxi Trunking Profile Cable Management System is designed for convenience and safety with compartments for separate wiring applications.

Maxi Trunking Profile Fittings are available in moulded and fabricated form, thus adding a sleek touch to your interiors.

## PVC PANEL TRUNKING

**Precision PVC Panel Trunking** is manufactured from high impact polyvinyl chloride (PVC) to ensure panel & machinery safety in extreme conditions. These trunkings are ideal to channelise medium, big size panels & various applications where economy, space saving, safety and durability are paramount.

## Applications

To conduct, organise and protect cables inside electrical and telecommunication panels, industrial machinery wiring, computer LAN wiring and data centers

## Features

Fire Retardant

Thermal Resistant  
(-5° C to +60° C)

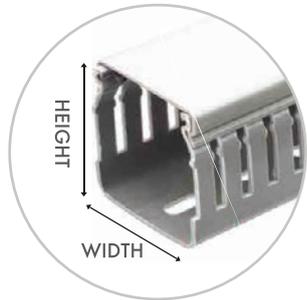

High Tensile Strength  
(390kg/cm<sup>2</sup>)

- Non - brittle, wrap proof
- Vertical slides and detachable strips facilitates systematic wiring, permits faster connections, additions and fault tracing of wires
- Avoids bunching, taping and provides complete electrical insulation
- Unique cover locking design prevents popping of wires while removing cover
- Elongated slots at bottom allows flexible mounting

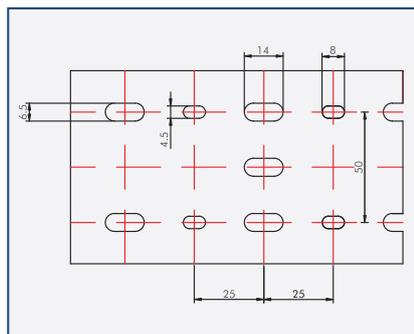

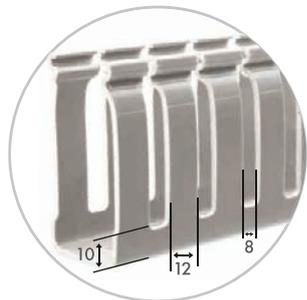

STANDARD SLOT

THIN SLOT

For Panel Trunking  
75 X 75, 100 X 75, 100 X 100  
All Dimensions are in (mm)

## Optimal grip lid

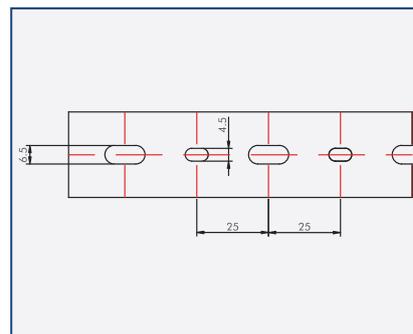

- Precision's Panel Trunking Lid design provides high capacity to sustain leads of wire in the case of a cable positioned in the centre of the duct and avoids them from riding up.
- Quick snap on/off non-slip assembly forms a firm & rigid channel.
- Interlocking lid and channel is optimised to make the system easier to install and to provide discrete routing of cables.
- Uniform grip and thickness throughout the length system with independent non-slip lid, keeps cover in place during high vibration applications.

## Wall perforation rib design

- All wall perforation ribs of Precision Panel Trunking have larger rounded slots for easy insertion of wires and cables.
- Rounded design with burr - free edges to prevent any injury to the hand of the user or to the cable insulation.

## Elongated mounting slots

- Perforated base with elongated slot allow flexible mounting and better fastening of the cables.
- Robust sections.

For Panel Trunking

**PRECISION**<sup>®</sup>

Pipes | Desh ki Lifeline

**CORRUGATED  
FLEXIBLE CONDUIT  
PIPES & FITTINGS**

**Precision Corrugated Flexible Conduit Pipes & Fittings**

come in a wide and comprehensive range of material variants to suit a variety of applications. These conduits are manufactured in variants based on the final application for wiring purposes.

**Polypropylene Flexible Conduits** are the best solution for applications where resistance to constant flexing and vibration is essential, these conduits display excellent flexibility. Moreover, they are light weight and easy to install which makes them very popular. Temperature resistant from  $-5^{\circ}\text{C}$  to  $+90^{\circ}\text{C}$ .

**Steel Wire Reinforced Flexible PVC Conduits** are manufactured with soft polyvinyl chloride (PVC) wall fused to high tensile steel wire in a coiled state. These conduits are unaffected by inorganic acid, alkali & saline water. Most suitable for electrical wiring in buildings, switch boards, panels, machinery, dust collectors, air dusting, exhaust of fumes, shrouds of railway coach wiring and hospital equipments. Temperature resistant from  $-5^{\circ}\text{C}$  to  $+90^{\circ}\text{C}$ .

### **Galvanised Steel Flexible Conduit**

Precision Steel Flexible Conduit Pipes are made from galvanised steel, helical wound strips having a square lock type construction and are manufactured in accordance to Indian/British Standards in galvanized zinc coating with spiral corrugated pattern finished surface. Mostly used as low pressure hose in Industrial domestic air conditioning, ventilation systems and as mechanical protection for insulated electrical cables & wires which may be exposed to atmospheric conditions.

### **Galvanised Steel Flexible Conduit With PVC Coating**

Precision PVC Coated Steel Flexible Conduit Pipes are made from galvanized steel, helical wound strips having a square lock type construction and are manufactured in accordance to Indian/British Standards in poly vinyl coating. They are available in black/grey colour with spiral corrugated pattern finished surface. Most suitable for mechanical protection of cable and wire in tunnels, hospitals, high-rise office blocks and public buildings.

## CABLE TIES

**Precision Cable Ties** are manufactured primarily from high-strength nylon, engineered fastening devices designed to securely bundle and organize cables, wires, and other components. Ties feature ratcheting mechanism that allows the strap to lock in place, providing a reliable and tamper-resistant hold. Precision Cables ties are available in various lengths, tensile strength ranges from 78N to 530N depending on size and width. Precision ties are widely used across electrical, automotive, aerospace, and industrial applications.

## Applications.

Industrial & Manufacturing Securing components during assembly or transit bundling wires, hoses and tubing Automotive Organizing engine bay wiring , Fastening brake lines or fuel hoses Aerospace managing miles of cabling in aircraft Electronics & IT cable management in server racks and data centers

## MATERIAL DATA

Specific Gravity	:	1.40 - 1.46
Impact Resistance	:	High impact resistance. The material is formulated to comply with -5°C to +60°C as per IS 9537-Part 3 and IS 14927-Part 2 Cable Trunking Standards.
Tensile Strength	:	450/565 kg/cm <sup>2</sup>
Chemical Resistance	:	The material is virtually unaffected by inorganic acid, alkalis and salt.
Coefficient of linear Expansion	:	7x10/m/deg.C
Water Absorption	:	Negligible
Flammability	:	IS 9537-Part 3, IS 3419:1988, IS 14927-Part 2, BS 4607 and BS EN 61386-21
Vicat. Softening point (Pipe & Trunking)	:	80°C at 5 kg Load
Vicat. Softening point (Moulded Fittings)	:	76°C
Oxygen Index	:	40%
Electric Strength	:	To the requirement of IS 9537-Part 3, IS 3419:1988, IS 14927-Part 2, BS 4607 and BS EN 61386-21
Insulation Resistance	:	To the requirements of IS 9537-Part 3, IS 3419:1988, IS 14927-Part2, BS 4607 and BS EN 61386-21
Operating Temperature	:	-5°C to +60°C

## STANDARDS

Conduit	:	IS 9537-Part 3, BS EN 61386-21
Conduit Fittings	:	IS 3419:1988 with latest amendment, BS 4607
Trunking	:	IS 14927-Part 2, BS EN 50085-2-1:2006

## QUALITY CONFIRMATION

## LOW VOLTAGE DIRECTIVE

Precision products that comes within the scope of Low Voltage Directive (LVC) 2006/95/EC, RoHS Directive 2002/95/EC will be CE marked on their product or packaging that they meet the necessary requirements of the directive.

## CONDUIT AND TRUNKING

The following notes are intended to be a guide to the installation of Precision Conduit, Trunking and Fitting. To ensure safety in installation, commissioning and maintenance, work should be undertaken by competent personnel and in accordance with relevant codes of practice and statutory requirements. Information on installation can be found in:

- Regulations, Indian standards specifications and code of practice.
- Regulation for electrical equipment of buildings (IEE publication).

### CONDUIT

#### Choice of Conduit

The choice depends on the type of work being undertaken and the specification, Heavy Mechanical Stress (HMS) and Medium Mechanical Stress (MMS) Round Conduits are normally used in casting in situ and surface work. Light Mechanical Stress (LMS) Conduit is suitable for concealed work in drops and in screeds & surface. Trunking Profile are generally used as a method of installing cables in domestic / commercial for surface work and installation beneath plaster.

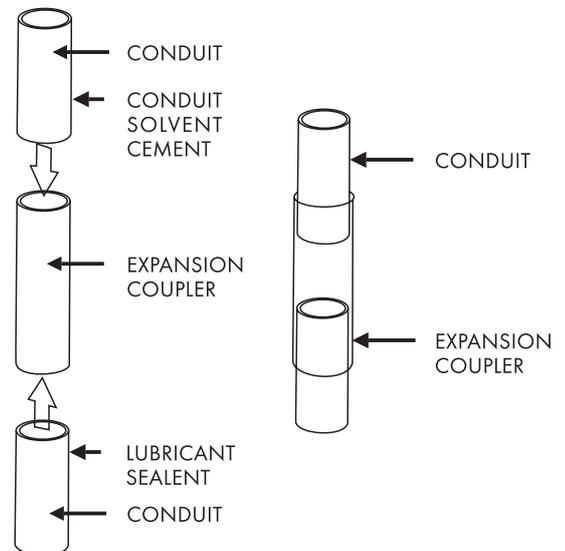

#### Surface Installation

All horizontal runs of conduit should be secured at a maximum distance of 0.9 meter and vertical runs should be secured at a maximum of 1.2 meter. For high ambient temperatures or where rapid changes in temperature are likely to be encountered the distance should be reduced. At fittings or where directional changes takes place the conduit should be fastened approximately 150 mm either side to maintain support. The fastening should not be over tightened to permit thermal movement of the conduit.

#### Joint and Couplers

To accommodate for thermal movement due to temperature change on surface installations, it is recommended that expansion couplers be used at a maximum distance of 6 meters intervals. Where high ambient temperature or frequent variation in temperature is likely to occur this distance should be reduced. Expansion couplers are installed with the short side coated with solvent cement and coupler pushed firmly over the conduit down to nib. The slip side coated with silicon grease receives the conduit to a midpoint to the nib. This will then permit for expansion or contraction providing the conduit is free to move in the saddle.

Conduit fittings are installed in the system using solvent cement for permanent installation and silicon grease where installation is subject to frequent changes.

## Jointing

PVC solvent cement is the recommended method of joining conduit into fitting like couplings, adaptors, bends and boxes. Precision solvent cement is especially formulated for watertight permanent joint.

### **BONDING INSTRUCTIONS**

Conduits and Fittings to be bonded must be clean, dry and free from oil moisture, dirt and grease.

- Cut the pipe, remove burr from the both inside and outside of the pipe with knife, file or reamer.
- Apply an even layer of cement to the pipe and fitting.
- Immediately push the pipe into the fitting together to the full depth without twisting. Hold in place for 30 seconds and clean off excess cement.

## Bending

Bending of conduit up to 25 mm in diameter can be carried out using correct size and gauge of bending spring. It should be noted that Heavy gauge spring is plated gold colour for heavy conduit. Medium gauge spring is plated silver colour for medium conduit and Light gauge spring is plated black colour for light conduit. Make sure they are not damaged in any way, as this can cause the conduit to kink and fracture making removal of spring difficult.

### Cold Bending

To bend the conduit, insert the spring to the desired position, grip the conduit on either side of the bend and bring slowly together to form the bend. The bend should be made more acute than necessary because of tendency of the PVC to recover after bending. Pull the spring gently. Do not pull too hard otherwise damage to the spring may occur. The conduit should then be fastened into position to prevent further recovering.

### Hot Bending

For conduit sizes over 25 mm diameter, hot bending is required, with the same procedure as cold bending; but with the application of gentle heat just prior to bending with care being taken to avoid the direct application of flame to the conduit. When the conduit is in pliable state, slowly bend around a suitable former, holding the position for about one minute until set.

If the conduit is bent too fast or, particularly in the case of light conduit, there is a risk of damage to both the conduit and spring. Similarly once the bend has been made it should not be forced backwards, but be allowed to recover naturally.

## Earthing

The properties of PVC make it an all insulated system and the use of separate earth cable is essential which greatly reduces the risk of poor earth continuity that can result from any breakdown of joint, which may occur in a steel system.

## DIMENSIONS OF ROUND CONDUIT uPVC PIPES IS 9537-PART 3

Nominal Size (mm)	Outside Diameter (mm)	Tolerance on Outside Diameter (mm)	Inside Diameter (Min.) (mm)

## MINI/MAXI TRUNKING PROFILE

Precision Trunking Profile system is designed to give improved appearance and security to surface cables with its wide range of Trunking sizes and fittings offers an efficient and economical solution to cable management. Trunking Profile consists of base and clip on lid which is fitted to the base by pressing it along its front face. The lid can be easily removed by lifting it from the base at one end and peeling it away. The lid has an easy closing mechanism, which is designed to give a securely closed installation, yet is easily accessible for maintenance or modification.

### Mounting

Drill oversize holes on base of Trunking Profile to mechanically fix to the desired surface using flat head screws with washers. Fixing center should not be more than 400 mm apart, or more than 150 mm away from the end of the straight run.

### Joints

At each joint 3 mm should be left for expansion. A fine toothed tension saw and mitre block should be used to cut the Trunking to provide a neat installation. Internal bends must be mitred to ensure total enclosure of Trunking Profile. External bends should be cut square with the corner and at angles and tees, cut the side wall of Trunking Profile for the cable entry. None of the cutting is critical as the clip on fittings have a built-in overlap for the lid and sidewalls.

## CONDUIT AND TRUNKING CABLE CAPACITIES

Single-core PVC - insulated cables in straight runs of conduit not exceeding 3 meters in length.

For each cable it is intended to use, obtain the appropriate factor from Table 1A.

Add all the cable factors so obtained and compare with the conduit factors given in Table 1 B.

The conduit size which will satisfactorily accommodate the cables in that size having a factor equal to or exceeding the sum of the cable factors.

Single-core PVC - Insulated cables In straight runs of conduit exceeding 3 meters in length, or in runs of any length incorporating bends or sets.

For each cable it is intended to use, obtain the appropriate factor from Table 1C.

Add all the cable factors so obtained and compare with the conduit factors given in Table 1D, taking into account the length of the run it is intended to use and the number of bends and sets in that run.

The Conduit size which will satisfactorily accommodate the cables is that size having a factor equal to or exceeding the sum of the cable factors.

**TABLE 1A**
